## Trails and Pathways

Since 2011, the State has had a renewed emphasis on the benefits of an integrated non-motorized pathway and recreational trail network to provide opportunities for pedestrians and bicyclists to travel safely and efficiently and to expand outdoor recreation opportunities while enjoying the natural, cultural, and historic assets of Delaware. It also recognizes the benefits of integrated multi-modal transportation infrastructure in improving the economic and environmental sustainability of communities. The following table lists the funding for trails and pathways from the Delaware Department of Transportation (DelDOT) and the Delaware Department of Natural Resources and Environmental Control (DNREC) since FY 2020.

**Table A.1 Trails and pathways funding, fiscal years 2020-2024, in millions**

## Roads and Bridges

DelDOT is responsible for maintaining approximately 85 percent of all roads in Delaware compared with other states, which maintain about 20 percent of their roads. The state also is responsible for transit services. Responding to the demands of Delawareans for a safe, efficient transportation system is a challenge, especially in light of recent growth and development trends. Table A.4 demonstrates several trends that are relevant to transportation planning.

## Water and Wastewater

While the operation of drinking water and wastewater systems has traditionally been the domain of Delaware’s local governments, the state Department of Health and Social Services (DHSS) and DNREC do provide significant funding to allow for the improvement and expansion of these systems. Table A.5 lists recent state and federal expenditures on wastewater projects through the Water Pollution Control Revolving Funds, which is a program that is administered by DNREC to provide support for community wastewater service projects.
